**DETAILED ACTION**

***Allowable Subject Matter***

1. Claim 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for voice optimization in a packet switched network. The prior arts in the record fail to teach or make obvious to a method comprising setting default parameters for the end-point devices with respect to choice of preferred CODEC, number of voice samples per packet, and jitter buffer size, and performing one or more tests to determine an optimum configuration for the end-point devices within a structure of the claim. These features are claimed in the independent claims 1, 14 and 20 and render them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
